Brascan SoundVest Rising Distribution Split Trust

BSD.UN / BSD.PR.A

2008 Annual Report

IN PROFILE

Brascan SoundVest Rising Distribution Split Trust (the "Trust") is managed by Brookfield Investment Funds Management Inc., a subsidiary of Brookfield Asset Management Inc., a global asset manager focused on property, power and other infrastructure assets, with approximately US\$80 billion of assets under management.

The Trust's investment advisor and portfolio manager is Brookfield Soundvest Capital Management Ltd., an established investment advisor with expertise investing in income trusts and equities.

BSD.UN / BSD.PR.A (TSX LISTED) UNIT INFORMATION

Units Outstanding (Dec. 31, 2008):	5,682,543 capital units and 5,682,543 preferred securities
Targeted 2009 Monthly Distribution:	Capital unit distributions were suspended in each of October, November and December 2008, as well as in January, February and March 2009 in accordance with the terms of the Trust's Declaration of Trust. The Trust will continue to monitor its net asset value per capital unit to determine if it will be able to make monthly distributions in the future.
Targeted 2009 Quarterly Distribution:	Preferred securities: \$0.15 per security, payable quarterly (\$0.60 per security annually)
Record Date:	Capital units: Last business day of each month Preferred securities: Last business day of February, May, August and November
Payment Date:	Capital units: On or about the 15th day of each subsequent month Preferred securities: On or about the 15th day of March, June, September and December

REPORT TO UNITHOLDERS

Dear Fellow Unitholders,

In this report, we will provide an overview of the returns for the major global indices and how this compares to the performance of the Canadian income trust sector. In addition, we will look at the current status of the income trust market and our expectations for this sector in the future. Also, we will discuss the Trust's performance for 2008 and share our outlook for 2009.

MARKET OVERVIEW

In 2008, historic declines took place across equity markets worldwide, including the Canadian income trust sector. As seen from the table below, all major global equity indices (including income trusts) suffered double-digit declines in 2008:

	2008 Returns
S&P/TSX Capped Income Trust Total Return Index	(26.1%)
S&P/TSX Composite	(33.0%)
S&P 500	(37.0%)
Dow Jones Industrial Average	(33.8%)
MSCI EAFE (Europe, Australasia, Far East)	(43.1%)
MSCI World	(40.3%)

The decline from the peak of 2008 to the low of the year for the various major North American indices was even more severe:

	Period	Returns (Peak to Low)
S&P/TSX Capped Income Trust Total Return Index	June 2008 - December 2008	(47.5%)
S&P/TSX Composite	June 2008 - November 2008	(49.5%)
S&P 500	January 2008 - November 2008	(49.7%)
Dow Jones Industrial Average	January 2008 - November 2008	(43.9%)

To put this performance in a historical context, all declines over 20% in U.S. stocks are listed below. We use U.S. data as there are 132 years of available data. Including 2008, declines of over 20% have occurred 15 times over the past 132 years or approximately every 9 years. As well, the only decline in the last 132 years larger than that of 2008 was the decline during the Great Depression, which started in 1929.

Period	Returns (Peak to Low)
March 1876 - June 1877	(33.1%)
September 1882 - June 1884	(20.8%)
January 1893 - May 1893	(25.1%)
September 1902 - October 1903	(25.8%)
September 1906 - November 1907	(34.0%)
November 1916 - December 1917	(28.0%)
October 1919 - August 1920	(22.8%)
August 1929 - May 1932	(83.4%)
November 1947 - May 1948	(21.8%)
June 1962 - December 1962	(22.3%)
December 1968 - July 1970	(31.5%)
January 1973 - October 1974	(43.3%)
September 1987 - December 1987	(30.2%)
September 2000 - October 2002	(43.3%)

Source: *The Globe & Mail*

The income trust sector has not been immune to the worldwide decline in equity values. For the major sectors of the Canadian income trust market, returns in 2008 were as follows:

Sub-sector	2008 Returns
Oil and gas royalty trusts	(22%)
Business trusts	(40%)
Oil & gas services ¹	(44%)
Real estate investment trusts (REITs)	(43%)
Power and pipeline trusts	(21%)

¹ Oil & gas services trusts are classified as business trusts for the Brascan SoundVest Funds

Source: RBC Capital Markets

All trust sectors posted negative returns in excess of 20%, with power and pipeline trusts having the strongest returns at negative 21%. According to RBC Capital Markets, only 16 income trusts, or less than 9% of its universe of 194 trusts (the RBC Capital Markets trust universe includes trusts on the S&P/TSX Venture exchange and foreign issuers), had positive returns in 2008.

INCOME TRUSTS – A SECTOR IN TRANSITION

The Tax Fairness Plan for Canadians is now law and income trusts have less than two years remaining before they will be subject to a Distribution Tax beginning in their 2011 taxation year. Effectively, income trusts are viewed as corporations with a tax holiday until 2011.

Since the announcement of the Tax Fairness Plan for Canadians on October 31, 2006, the overall number of income trusts has continued to decrease.

Sub-sector	# of Trusts Dec. 31/06	# of Trusts Dec. 31/07	# of Trusts Dec. 31/08	2006 to 2007 Change	2007 to 2008 Change	2006 to 2008 Change
Oil and gas royalty trusts	31	27	22	(4)	(5)	(9)
Business trusts	168	135	119	(33)	(16)	(49)
REITs ¹	33	27	27	(6)	—	(6)
Power and pipeline trusts	23	19	16	(4)	(3)	(7)
Total	255	208	184	(47)	(24)	(71)

¹ Subject to individual circumstances, REITs are generally not affected by the Tax Fairness Plan for Canadians

The decrease in the number of income trusts has been largely due to the significant number of takeovers, mergers and sales during 2008 as seen in the table below:

	# of Trusts	Market Capitalization Acquired ¹
Takeovers/mergers/sales - Domestic acquirer	(15)	\$ 23.6
Takeovers/mergers/sales - Foreign acquirer	(3)	4.4
Conversions to corporations	(6)	6.7
Total	(24)	\$ 34.7

¹ In billions
Source: RBC Capital Markets

Domestic acquirers were responsible for the largest number of transactions (15), representing the greatest amount of market capitalization acquired (\$23.6B). According to RBC Capital Markets, the average takeover premium for 2008 was 20% (based on the last close price prior to first offer or announced strategic review).

We anticipate that the number of income trusts will continue to decrease as 2011 approaches. We still expect that many of the businesses will continue to exist as independent entities; however, we expect their legal form to be different. Some trusts may convert back to corporations and retain their cash flow to fund future growth, while others may become high-dividend-paying corporations. As for those trusts that are acquired, these takeovers will likely continue to be done at a premium to their trading price prior to any announcement. We do believe that all income trusts (excluding REITs) will convert to corporations prior to 2013. This is due to the federal government's draft tax legislation released on July 14, 2008, which enables income trusts to convert to corporations on a tax-deferred basis until 2013.

Throughout this ongoing transition in the income trust market, trusts still offer investors some of the highest yields. As seen from the next table, the current income trust market continues to offer investors a diverse group of companies that generate attractive yields. As at December 31, 2008, the average yield for the income trust sector was 14.9%. This is significantly higher than the 4.0% yield offered by the S&P/TSX Composite Index and the 2.7% yield on the 10-year Canada bond. As noted earlier, many of the businesses currently structured as trusts are expected to continue to offer above-average yields both now and beyond 2010.

The income trust market yield profile as at December 31, 2008 was as follows:

Subsector	# of Trusts	Market Capitalization ¹	Average Yield
Oil and gas royalty trusts	22	\$ 43.0	18.1%
Business trusts	119	28.4	14.7%
Real estate investment trusts (REITs)	27	13.8	14.0%
Power and pipeline trusts	16	12.5	13.8%
Total	184	\$ 97.7	14.9%

¹ In billions

Compared to 2007, the number of income trusts decreased by 24 and the overall market capitalization declined by \$78.3 billion. In addition, the average yield has increased to 14.9% from 10.7% in 2007.

Distributions of income trusts are not fixed but tend to vary over time based on the economic performance of the business underlying the income trust and its distribution policy. Though the Tax Fairness Plan will hinder the ability of a trust to maintain its current distribution in 2011, there are approximately two years before the Tax Fairness Plan will be enacted. We believe certain trusts will be able to grow their distributable cash over this period to offset the impact of the new Tax Fairness Plan. From 2004 to 2006, approximately 40% of trusts, each year, have increased their distributions. However, we expect this figure to be lower in the future as trusts continue to adapt to the future Tax Fairness Plan. This can be evidenced by the fact that since the Tax Fairness Plan was announced, less than 22% of trusts increased their distributions during 2007 and only 12% of income trusts increased their distributions during 2008. We would expect that even fewer trusts will increase distributions in 2009 as a result of both a weak economy and the approaching taxation deadline.

	2008	2007	2006	2005	2004
Increased distributions ¹	12.0%	21.2%	39.2%	44.9%	38.3%
Maintained distributions ¹	57.6%	57.7%	45.1%	46.6%	52.0%
Decreased/omitted/no distribution ¹	30.4%	21.2%	15.7%	8.5%	9.7%

¹ Based on announcement date

A number of income trusts are strong businesses, are run by experienced management, and possess attractive economics. Many have managed to grow their distributable cash and have increased their distributions in the past. We are confident that the strongest trusts will continue to perform well in the future and will provide attractive long-term investment opportunities if purchased at reasonable prices.

TRUST PERFORMANCE

The Trust was formed to actively manage a diversified portfolio of selected income trust securities from four primary sectors: business trusts, power generation and pipeline trusts, oil and gas royalty trusts, and REITs. We invest in trusts in each of these four sectors that we believe are capable of generating high-quality cash flows with minimal sustaining capital requirements and that have the potential to appreciate in value.

For the year ended December 31, 2008, the Trust's published net asset value per unit of the capital units, which is used for purchases and redemptions, was \$0.00, resulting in a total return for the capital units, including distributions, of negative 89.0%. The combined net asset value (the "Combined Net Asset Value"), which refers to the value of a capital unit and a preferred security of the Trust, was \$16.76 at December 31, 2007 and decreased by 49.7% during the year to \$8.43 at December 31, 2008. During the same time frame, the S&P/TSX Capped Income Trust Total Return Index lost 26.1%. The decrease in the Combined Net Asset Value of the Trust was greater than the decline in the Index largely due to the Trust's overweight position in business trusts, which comprised approximately 33% of the Trust's total portfolio at December 31, 2008 compared to 20% for the Index. Business trusts and REITs were among the worst-performing sectors for 2008 with returns of negative 40% and negative 43%, respectively, according to RBC Capital Markets trust sector returns.

The Trust's split-share structure results in structural leverage for the capital units. The amount of structural leverage of the capital units is based on the ratio of the Trust's total portfolio over the net asset value of the capital units. At December 31, 2007, the structural leverage of the capital units was 2.6 times. The result was that every 1% change in the Trust's total portfolio would change the value of the capital units by 2.6%. The magnitude of this structural leverage increases exponentially as the net asset value of the capital units decreases. As at September 30, 2008, the leverage of the capital units was 4.1 times. The result was that every 1% change in the Trust's total portfolio would change the value of the capital units by 4.1%. Therefore, the negative 49.7% return for the Trust's total portfolio, combined with the structural leverage of the Trust, resulted in the net asset value per unit of the capital units being reduced to \$0.00.

We have taken steps aimed at restoring value for the capital units. On February 9, 2009, we announced that the Toronto Stock Exchange had accepted our Notice of Intention to make a normal course issuer bid. The Trust will have the right under the bid to purchase for cancellation up to 284,127 capital units and 284,127 preferred securities of the Trust, representing 5% of the 5,682,543 capital units and 5,682,543 preferred securities issued and outstanding as at January 29, 2009.

In accordance with the Trust's declaration of trust and trust indenture, any capital units purchased for cancellation will be accompanied by the Trust repurchasing an equal number of preferred securities, and vice versa. Purchases may commence on February 11, 2009, and will terminate on February 10, 2010. The Trust will not purchase in any given 30-day period, in the aggregate, more than 113,651 capital units and 113,651 preferred securities, being 2% of the issued and outstanding capital units and preferred securities as of the date hereof. Purchases made pursuant to the normal course issuer bid will be made in the open market through the facilities of the Toronto Stock Exchange. The price that the Trust will pay for any such shares will be the market price of such shares at the time of acquisition.

We are of the opinion that capital units and preferred securities of the Trust may become available during the proposed purchase period at prices that would make such purchases in the best interests of the Trust and its securityholders. As at March 24, 2009, 8,400 capital units and 8,400 preferred securities had been purchased under the bid. The Trust has not previously purchased its capital units or preferred securities under a normal course issuer bid.

For the twelve months ended December 31, 2008, the Trust generated net realized losses of approximately \$13.0 million. This was largely due to liquidating the Trust's positions in Newport Partners Income Fund, Petrowest Energy Services Trust, XS Cargo Income Fund, and BTB REIT for losses of \$7.5 million, \$3.4 million, \$1.1 million, and \$0.9 million, respectively. All positions were liquidated due to the deteriorating business prospects of these entities.

Distributions

The Trust declared and paid monthly distributions in 2008 at its targeted monthly rate of \$0.084 per unit for the first nine months of the year for its capital units. On October 23, 2008, the Trust announced that it had suspended its distribution on its capital units for the month of October in accordance with its Declaration of Trust, as the Trust's net asset value was below the required 1.4 times coverage ratio. The Trust also subsequently suspended its distribution on its capital units for each of the months of November and December 2008, as the Trust's net asset value continued to be below the required 1.4 times coverage ratio. The Trust has been unable to make distributions on its capital units to date in 2009 and will continue to monitor its net asset value per capital unit to determine if it will be able to make monthly distributions in the future.

Redemptions

On October 23, 2008, the Trust also announced that it was temporarily suspending the annual redemption rights that would have arisen in November 2008 for both its capital units and preferred securities. The Declaration of Trust provides for the suspension of redemptions when the 1.4 times coverage ratio cannot be maintained. The Trust is continuing to monitor its net asset value to determine if and when it will be able to resume redemptions.

OUTLOOK

We expect the income trust sector to continue to transition until 2013. Until the income trust sector becomes taxable starting in 2011, we believe the high level of acquisitions and strategic-review activity will continue. Income trusts will continue to convert to corporations, and the overall number of income trusts is expected to continue to decrease. By 2011, we expect most income trusts (with the exception of REITs) to convert to

corporations, with the balance converting by the end of 2013. We continue to evaluate the Trust's investment strategy in light of the changes in the income trust sector.

In the meantime, we believe that income trusts offer an attractive opportunity for investors searching for yield and value. Not only does the sector offer a significantly higher yield at 14.9% versus the TSX Composite at 4.0% or the 10-year Canada bond at 2.7%, but specific company valuations have become more attractive over the past year as a result of the large decline in equity prices.

We continue to believe that the Trust's holdings of income trusts are run by quality management and possess attractive business economics. Over the long term, for any equity investment – whether it is legally constituted as a corporation, a trust, or another legal form – we believe it is the business performance of the entity that will determine the success of the investment. We will continue to monitor the business performance of the Trust's investments and will continue to adapt to the changing income trust environment.

Thank you for your continued support of our Trust.

Caution Regarding Forward-Looking Statements

The Report to Unitholders and Management Report of Fund Performance contain forward-looking information within the meaning of Canadian provincial securities laws and other "forward-looking statements" and information. The words "anticipate," "expect," "continue," "likely," "believe," "may," "plan," "expect," "aim," "will," "potential," "should," "seek," and other expressions which are predictions of or indicate future events, trends or prospects and which do not relate to historical matters, identify forward-looking statements. These forward-looking statements include, among others, statements with respect to the future performance of the income trust sector and particular trusts, the likelihood of income trust conversions to corporate structures, the ability of certain trusts to increase their distributable cash, acquisition trends in the income trust sector, Trust annual distribution targets and portfolio weightings, future performance of Oil and Gas Royalty Trusts, future positioning of the Trust, income trust yields and distribution levels in the future, and other statements with respect to our beliefs, outlooks, plans, expectations and intentions. Although the Manager and Investment Advisor believe that the anticipated future results, performance or achievements expressed or implied by the forward-looking statements and information are based upon reasonable assumptions and expectations, the reader should not place undue reliance on forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Trust to differ materially from anticipated future results, performance or achievement expressed or implied by such forward-looking statements and information. Factors that could cause actual results to differ materially from those set forward in the forward-looking statements or information include: general economic conditions; changes in interest and exchange rates; changes in legislation or practices governing the income trust sector; and other risks and factors described from time to time in the Trust's Prospectus, Annual Information Form and other documents filed by the Manager with the securities regulators in Canada. Except as required by law, the Manager undertakes no obligation to publicly update or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise.

MANAGEMENT REPORT OF FUND PERFORMANCE

This annual management report of fund performance (“MRFP”) is intended to provide readers with the financial highlights and an assessment of the performance of Brascan SoundVest Rising Distribution Split Trust (the “Trust”) for the year ended December 31, 2008 (the “Period”). All figures in the MRFP are in Canadian dollars as at December 31, 2008, unless otherwise indicated.

This annual MRFP contains financial highlights but does not contain the complete annual financial statements of the Trust. You can get a copy of the annual financial statements at your request, and at no cost, by calling 888-777-4019; by writing to us at Brookfield Place - 181 Bay Street, Suite 300, Toronto, Ontario, M5J 2T3; or by visiting our website at www.brookfieldfunds.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Trust’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Trust’s investment objectives are to provide holders of preferred securities with fixed quarterly interest payments in the amount of \$0.15 per preferred security (\$0.60 per annum to yield 6% per annum on the original subscription price of \$10.00) and the repayment of the original subscription price at maturity. For unitholders, the Trust’s objectives are to provide holders with tax efficient and growing monthly cash distributions, a significant portion of which is tax deferred, and capital appreciation on the portfolio.

The Trust is an actively managed investment fund that invests in a diversified portfolio of income trusts. The Trust may also opportunistically invest in high-yielding, equity-based securities, up to a maximum of 10% of the value of the portfolio.

RISKS

The risks of investing in the Trust remain as discussed in the Trust’s Annual Information Form and Prospectus. As stated under “Risk Factors – No Assurances at Achieving Objectives” in the Trust’s Annual Information Form, the Trust intends to make monthly cash distributions to unitholders. However, such distributions may not be made if, after giving effect to the proposed distributions, the Combined Value would be less than 1.4 times the Repayment Price (as such terms are defined in the Trust’s Annual Information Form) (the “Coverage Ratio”). On October 23, 2008, the Trust announced that it had suspended its distribution on its capital units for the month of October in accordance with its Declaration of Trust, as the Combined Value was below the Coverage Ratio. The Trust also suspended the distribution on its capital units in respect of November and December 2008, as well as for each of January, February and March 2009, as the Combined Value continued to be below the Coverage Ratio required to pay such distribution under its Declaration of Trust. The Trust will continue to monitor its Coverage Ratio to determine if it will be able to make monthly distributions on its capital units in the future.

On October 23, 2008, the Trust announced that it was temporarily suspending the annual redemption rights that would have arisen in November in respect of both its Capital Units and Preferred Securities. The Trust’s Declaration of Trust provides for the suspension of redemptions when the Coverage Ratio cannot be maintained. The Trust is continuing to monitor its net asset value to determine when it will be able to resume redemptions.

There can be no assurance that the Trust will be able to repay the original subscription price. Please refer to the risks discussed under the section “Risk Factors – No Assurances at Achieving Objectives” in the Trust’s Annual Information Form and Prospectus.

RESULTS OF OPERATIONS

The Trust’s net assets decreased by \$38.4 million or 100.0%, from \$38.4 million as at December 31, 2007 to \$0 million as at December 31, 2008. Of this change, \$34.1 million is attributable to investment performance (net of expenses) and \$4.3 million to unitholder activity, which is composed of \$4.3 million of distributions and \$0 million of redemptions. The Trust’s investment performance and unitholder activity for 2008 are discussed in more detail below.

Investment Performance

The Trust generated net losses from operations of \$34.1 million for the year, which consisted of net realized losses of \$13.0 million, net unrealized losses of \$32.9 million and return of capital of \$2.2 million, offset by net investment income of \$5.1 million and a decrease in value of preferred securities of \$8.9 million. At December 31, 2008, the decline in the value of the investment portfolio exceeded the subscriptions received from the capital units, which resulted in the excess being absorbed by the preferred securities. As the preferred securities are redeemable at \$10 or combined value, whichever is lower, the losses were adjusted against the preferred securities.

For the year ended December 31, 2008, the Trust generated net realized losses of approximately \$13.0 million. This was largely due to liquidating the Trust's positions in Newport Partners Income Fund, Petrowest Energy Services Trust, XS Cargo Income Fund, and BTB REIT for losses of \$7.5 million, \$3.4 million, \$1.1 million, and \$0.9 million, respectively. All were sold due to their deteriorating business prospects.

During the year, the Trust's published net asset value per unit, which is used for purchases and redemptions, decreased by 100.0%, resulting in a total return, including distributions, of negative 89.0%. During the same time frame, the S&P/TSX Capped Income Trust Total Return Index lost 26.1%. Given the split share structure of the Trust, the Trust had leverage in excess of 2.0 times throughout the year, which magnifies both the positive and negative returns of the Trust by approximately two times. The Trust underperformed the Index largely due to the poor performance of the portfolio's investments in the business trust sector, which comprised approximately 33% of the Trust's total portfolio at December 31, 2008 compared to 20% for the Index. At the start of 2008, over 45% of the Trust was invested in income trusts in the business trust sector, which was one of the worst-performing income trust sub-sectors, according to RBC Capital Markets, with a negative return of 40% for 2008.

Fees and Expenses

Fees and expenses for the year totalled \$4.8 million, down from \$6.1 million for 2007, representing an annualized management expense ratio ("MER") of 16.29% as compared to 10.83% for the year ended December 31, 2007. The MER is based on the total expenses of the Trust, including interest on preferred securities, for the stated year (excluding brokerage commissions) and is expressed as an annualized percentage of the daily average net asset value for the year. The MER before interest expense for the years ended December 2008 and 2007 was 4.06% and 3.44%, respectively. Although fees and expenses for the year declined as compared to the same period in 2007, the MER increased as the rate of decline in average net assets was greater than that of fees and expenses. Daily average net asset value declined by 47.6%, while expenses declined by 21.2% during the same period owing to the fixed nature of the interest on the preferred securities.

Unitholder Activity

To provide liquidity, capital units and preferred securities of the Trust are listed on the TSX under the symbols BSD.UN and BSD.PR.A, respectively. Under terms of the Trust's Declaration of Trust, additional liquidity is provided by way of an annual redemption program, under which the Trust's units and preferred securities, under certain conditions, are redeemable on the last business day of November of each year at 100% of the net asset value per unit. On October 23, 2008, the Trust announced that the annual redemption rights that would have arisen in November 2008 had been temporarily suspended. See "Redemptions" below. In addition, the Trust has a market purchase program whereby throughout the year the Trust, under certain conditions, is required to purchase shares when the units trade below 95% of their net asset value per unit, to a limit of 1.25% of the outstanding number of shares for a three-month period. During 2008, none of the Trust units or preferred securities were redeemed or cancelled, under the annual redemption program and no units were redeemed under the market purchase program. The manager of the Trust, however, announced on February 9, 2009 that the Toronto Stock Exchange had accepted its Notice of Intention to make a normal course issuer bid for the capital units and preferred securities of the Trust. See "Events Subsequent to Year End and Outlook" below.

Redemptions

On October 23, 2008, the Trust also announced that it was temporarily suspending the annual redemption rights that would have arisen in November 2008 for both its capital units and preferred securities. The Declaration of Trust provides for the suspension of redemptions when the 1.4 times coverage ratio cannot be maintained. The Trust is continuing to monitor its net asset value to determine if and when it will be able to resume redemptions.

Credit Facility

As at December 31, 2008, the Trust had a 364-day revolving term credit facility (the “facility”) available with a Canadian chartered bank bearing variable interest at prime or bankers’ acceptance rates. The Trust utilizes the borrowings to purchase additional portfolio investments and for general Trust purposes. The maximum draw under the facility is limited to the lower of \$8.5 million or an amount not exceeding 7% of the value of the assets within the portfolio of the Trust, which was reduced from a limit of \$11.0 million or an amount not exceeding 7% of the value of the assets within the portfolio of the Trust as at December 31, 2007. Subsequent to December 31, 2008, the maximum draw under the facility was further reduced to a limit of \$5.0 million or an amount not exceeding 7% of the value of the assets within the portfolio of the Trust. The facility is secured by a first-ranking and exclusive charge on all of the Trust’s assets. As at December 31, 2008, \$1.0 million was drawn on the facility, which represented 0% of net assets of the Trust. The minimum and maximum amounts borrowed under the facility during 2008 were \$1.0 million and \$5.1 million, respectively. A reduction in the credit facility may limit the Trust’s ability to employ leverage to magnify returns. In the current environment, the Trust will seek to cautiously use leverage as deemed appropriate.

RELATED-PARTY TRANSACTIONS

Brookfield Investment Funds Management Inc. (the “Manager”), a subsidiary of Brookfield Asset Management Inc., is the Manager of the Trust and is responsible for managing all of the Trust’s activities. Management fees are paid to the Manager based on terms set out in the Management Agreement at a rate of 1.10% per annum of the net asset value of the Trust. In addition, the Trust also pays the Manager a service fee equal to 0.40% per annum of the net asset value of the Trust. The service fee is, in turn, paid to investment dealers based on the proportionate number of units held by clients of such dealers. During the year, management fees accrued or paid to the Manager totalled \$0.9 million, of which \$0.45 million was paid to Brookfield Soundvest Capital Management Ltd. (the “Investment Advisor”). Service fees accrued or paid during the year totalled \$0.1 million.

RECENT DEVELOPMENTS

Accounting Policy Changes

Capital Disclosures

On December 1, 2006, the Canadian Institute of Chartered Accountants (“CICA”) issued Section 1535, Capital Disclosures (“Section 1535”) of the CICA Handbook, which establishes Generally Accepted Accounting Principles (“GAAP”) for financial reporting purposes. Section 1535 requires the disclosure of (i) an entity’s objectives, policies and processes for managing capital; (ii) quantitative data about an entity’s managed capital; (iii) whether an entity has complied with capital requirements; and (iv) if an entity has not complied with such capital requirements, the consequences of such non-compliance. This section applies to fiscal years beginning on or after October 1, 2007. As a result, the Trust adopted this section prospectively, beginning January 1, 2008.

Financial Instruments—Disclosures and Presentation

In December 2006, the CICA issued Section 3862 Financial Instruments: Disclosure (“Section 3862”) and Section 3863 Financial Instruments: Presentation (“Section 3863”). These two sections replaced CICA Handbook Section 3861 Financial Instruments - Disclosure and Presentation. Section 3862 requires financial statement disclosures on the nature and extent of risks arising from financial instruments and how these risks are managed. Section 3863 establishes standards for presentation of financial instruments and non-financial derivatives. Section 3863 describes the classification of financial instruments, from the perspective of the issuer, between liabilities and equity; the classification of related interest, dividends, losses and gains; and the circumstances in which financial assets and financial liabilities are offset. These sections apply to fiscal years beginning on or after October 1, 2007. As a result, the Trust adopted these sections prospectively, beginning January 1, 2008.

International Financial Reporting Standards

In 2005, the Accounting Standards Board of Canada (AcSB) announced that accounting standards in Canada are to be replaced with International Financial Reporting Standards (“IFRS”). In May 2007, the CICA published an updated version of its implementation plan, which outlines the key decisions that the CICA will need to make as it implements the Strategic Plan for publicly accountable enterprises that will replace Canadian GAAP with IFRS by January 1, 2011. The key elements of the Strategic Plan include disclosure of the qualitative impact in the 2008 financial statements, which will be disclosed in the Trust’s annual MRFP.

EVENTS SUBSEQUENT TO YEAR END AND OUTLOOK

On February 9, 2009, Brookfield Investment Funds Management Inc. (the "Manager"), as manager of the Trust, announced that the Toronto Stock Exchange had accepted its Notice of Intention to make a normal course issuer bid. The Trust will have the right under the bid to purchase for cancellation up to 284,127 of its capital units and 284,127 of its preferred securities, representing 5% of the 5,682,543 capital units and 5,682,543 preferred securities issued and outstanding as at January 29, 2009.

In accordance with the Trust's declaration of trust and trust indenture, any capital units purchased for cancellation will be accompanied by the Trust repurchasing an equal number of preferred securities, and vice versa. Purchases must terminate on February 10, 2010. The Trust will not purchase in any given 30-day period, in the aggregate, more than 113,651 capital units and 113,651 preferred securities, being 2% of the issued and outstanding capital units and preferred securities as of January 29, 2009. Purchases made pursuant to the normal course issuer bid will be made in the open market through the facilities of the Toronto Stock Exchange. The price that the Trust will pay for any such shares will be the market price of such shares at the time of acquisition.

The Manager is of the opinion that capital units and preferred securities of the Trust may become available during the proposed purchase period at prices that would make such purchases in the best interests of the Trust and its securityholders. The Trust has not previously purchased its capital units or preferred securities under a normal course issuer bid.

As at March 24, 2009, the Trust has repurchased 8,400 capital units and 8,400 preferred securities under the normal course issuer bid.

The Trust suspended its distribution on capital units for each of the months of January, February and March 2009 as the Trust's net asset value continued to be below the required 1.4 times coverage ratio. The Trust will continue to monitor its coverage ratio to determine if it will be able to make monthly distributions on its capital units in the future.

We expect the income trust sector to continue to transition until 2013. Until the income trust sector becomes taxable starting in 2011, we believe the high level of acquisitions and strategic-review activity will continue. Income trusts will continue to convert to corporations, and the overall number of income trusts is expected to continue to decrease. By 2011, we expect most income trusts (with the exception of REITs) to convert to corporations, with the balance converting by the end of 2013. We continue to evaluate the Trust's investment strategy in light of the changes in the income trust sector.

In the meantime, we believe that income trusts offer an attractive opportunity for investors searching for yield and value. Not only does the sector offer a significantly higher yield at 14.9% versus the TSX Composite at 4.0% or the 10-year Canada bond at 2.7%, but specific company valuations have become more attractive over the past year as a result of the large decline in equity prices.

We continue to believe that the Trust's holdings of income trusts are run by quality management and possess attractive business economics. Over the long term, for any equity investment – whether it is legally constituted as a corporation, a trust, or another legal form – we believe it is the business performance of the entity that will determine the success of the investment. We will continue to monitor the business performance of the Trust's investments and will continue to adapt to the changing income trust environment.

FINANCIAL HIGHLIGHTS

The following tables detail selected key financial information about the Trust and are intended to assist readers in understanding the Trust's financial performance since inception. This information is derived from the Trust's audited financial statements.

The Trust's Net Assets Per Unit¹

	2008 ³	2007 ³	2006 ³	2005 ⁴
Net asset value - beginning of year	\$ 6.76	\$ 8.92	\$ 13.79	\$ 13.79 ⁵
Increase (decrease) from operations				
Total revenue	1.73	2.00	2.29	1.78
Total expenses	(0.83)	(0.91)	(1.00)	(0.82)
Transaction costs	(0.01)	(0.02)	—	—
Net realized losses on sale of investments	(2.29)	(0.79)	(2.99)	(0.51)
Net changes in unrealized (losses) gains	(5.78)	(0.40)	(1.09)	0.97
Return of capital	(0.39)	(0.53)	(0.72)	(0.50)
Increase in value of preferred securities	1.57	—	—	—
Total (decrease) increase from operations²	(6.00)	(0.65)	(3.51)	0.92
Distributions				
From dividend income	(0.10)	(0.05)	—	—
From investment income	(0.35)	(0.34)	(0.37)	(0.26)
Return of capital	(0.31)	(1.01)	(1.01)	(0.75)
Total distributions⁶	(0.76)	(1.40)	(1.38)	(1.01)
Net asset value - end of year⁷	\$ —	\$ 6.76	\$ 8.92	\$ 13.79

¹ This information is derived from the Trust's audited annual financial statements. The net assets per unit presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the Recent Developments section of this MRFP. This difference is due to the revaluation of the investment portfolio using bid pricing in determining the net assets of the Trust

² Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The decrease/increase from operations is based on the weighted average number of units outstanding over the financial period.

³ As at and for the twelve months ended December 31

⁴ As at and for the period from inception (March 16, 2005) to December 31, 2005

⁵ Initial public offering price of \$15.00 per unit, net of issuance costs

⁶ Distributions were paid in cash

⁷ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The decrease/increase from operations is based on the weighted average number of units outstanding over the period. Accordingly, totals may not sum in the above table due to the different basis for computing the per unit amounts

The following table illustrates components of the Trust's overall return:

	2008 ¹	2007 ¹	2006 ¹	2005 ²
Net investment income	\$ 5,066,242	\$ 7,102,394	\$ 8,787,805	\$ 7,034,556
Transaction costs	(51,783)	(119,925)	—	—
Net realized losses on sale of investments	(12,989,629)	(5,159,373)	(20,385,698)	(3,714,117)
Net change in unrealized (losses) gains	(32,850,560)	(2,618,968)	(7,415,288)	7,077,409
Return of capital	(2,193,960)	(3,467,509)	(4,945,140)	(3,642,936)
Decrease in value of preferred securities	8,921,502	—	—	—
(Loss) income from operations	(34,098,188)	(4,263,381)	(23,958,321)	6,754,912
(Loss) income from operations per unit	(6.00)	(0.65)	(3.51)	0.96
Net assets per unit	\$ —	\$ 6.76	\$ 8.92	\$ 13.79

¹ As at and for the twelve months ended December 31

² As at and for the period from inception (March 16, 2005) to December 31, 2005

Ratios and Supplemental Data

	2008 ¹	2007 ¹	2006 ¹	2005 ²
Net assets	\$ —	\$ 38,394,188	\$ 58,781,011	\$ 94,364,187
Number of units outstanding	5,682,543	5,682,543	6,591,715	6,842,341
Management expense ratio before interest expense	4.06%	3.44%	2.90%	2.64%
Management expense ratio ³	16.29%	10.83%	8.22%	7.33%
Management expense ratio before waivers or absorptions	16.29%	10.83%	8.22%	7.33%
Management expense ratio including one time agent's fees and issuance costs	16.29%	10.83%	8.22%	18.27%
Trading expense ratio ⁴	0.18%	0.21%	0.18%	0.50%
Portfolio turnover rate ⁵	12.58%	17.25%	22.58%	35.23%
Monthly distribution per unit	\$ 0.084	\$ 0.1167	\$ 0.1167	\$ 0.1125
Annualized trailing yield ⁶	—	22.0%	17.3%	11.0%
Closing market price	\$ 0.27	\$ 6.37	\$ 8.10	\$ 12.30

¹ As at and for the twelve months ended December 31

² As at and for the period from inception (March 16, 2005) to December 31, 2005

³ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period

⁴ The trading expense ratio represents commission costs expressed as an annualized percentage of daily average net asset value during the period

⁵ The Trust's portfolio turnover rate indicates how actively the Trust's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Trust buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the Trust in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Trust

⁶ Based on annualized cumulative distributions of \$1.40 per unit and the closing market price

Management and Service Fees

Pursuant to a management agreement, the Manager provides management and administrative services to the Trust, for which it is paid a management fee equal to 1.10% per annum of the net asset value of the Trust, calculated and paid monthly, plus applicable taxes. The Trust also pays to the Manager a service fee equal to 0.40% per annum of the net asset value of the Trust, calculated and paid quarterly. The service fee is in turn paid by the Manager to investment dealers based on the proportionate number of units held by clients of such dealers at the end of each calendar quarter.

PAST PERFORMANCE

The following chart and table show the past performance of the Trust and do not necessarily indicate how the Trust will perform in the future. The information shown is based on the net assets per unit and assumes that distributions made by the Trust in the periods shown were reinvested (at the net assets per unit) in additional units of the Trust.

Year-by-Year Returns

The bar chart shows the Trust's total returns (based on net assets per unit) and includes distributions made in each period since inception to December 31, 2008. The chart shows, in percentage terms, how an investment held on the first day of each fiscal period would have increased or decreased by the last day of the fiscal period.

Annual Compound Returns

The following table shows the Trust's compound return, based on published net asset values, for the periods noted and the annual compound returns, based on net asset values, since inception and for the three-year period ended December 31, 2008, compared with the Index.

	2008 ¹	2007 ¹	2006 ¹	2005 ²	3-Year ³	Since Inception ⁴
Trust - Net asset value	(100.0%)	(22.3%)	(35.3%)	—%	(100.0%)	(100.0%)
Trust - Total Return, including distributions	(89.0%)	6.5%	(25.3%)	7.3%	(36.4%)	(32.7%)
S&P/TSX Capped Income Trust Total Return Index	(26.1%)	6.6%	(2.8%)	22.6%	(8.5%)	(1.7%)

¹ For the twelve months ended December 31

² For the period from inception (March 16, 2005) to December 31, 2005, net of issuance costs

³ Period from January 1, 2006 to December 31, 2008

⁴ For the period from inception (March 16, 2005) to December 31, 2008, net of issuance costs

SUMMARY OF INVESTMENT PORTFOLIO

The Summary of Investment Portfolio may change due to ongoing portfolio transactions of investments in the Trust. A quarterly update is available on our website at www.brookfieldfunds.com.

Portfolio Composition

As at December 31, 2008, the Trust was invested in the following sectors in the percentages shown below:

	2008 Actual Weighting ¹	2007 Actual Weighting ¹	2006 Actual Weighting ¹	Permitted Weighting
Business trusts	32.2%	45.4%	44.2%	20% - 60%
Power generation and pipeline trusts	7.3%	5.3%	7.2%	5% - 35%
Oil and gas royalty trusts	37.2%	25.4%	24.3%	10% - 50%
REITs	13.7%	22.2%	23.0%	5% - 45%
Total income trusts	90.4%	98.3%	98.7%	85% - 100%
High-yielding equity-based securities	9.6%	1.7%	1.3%	0% - 10%
	100.0%	100.0%	100.0%	

¹ Based on market value as at December 31

MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

The accompanying financial statements of Brascan SoundVest Rising Distribution Split Trust (the "Trust") and other financial information have been prepared by Brookfield Investment Funds Management Inc., a subsidiary of Brookfield Asset Management Inc. (the "Manager" of the Trust), which is responsible for their integrity and accuracy. To fulfill these responsibilities, the Trust maintains policies, procedures and systems of internal control to ensure that its reporting practices and accounting and administrative procedures are appropriate. These policies and procedures are designed to provide a high degree of assurance that relevant and reliable financial information is produced.

These financial statements have been prepared in conformity with accounting principles generally accepted in Canada, and where appropriate, reflect estimates based on management's judgment. The financial information presented throughout this Annual Report is generally consistent with the information contained in the accompanying financial statements.

The Manager, on behalf of the unitholders, has appointed the external firm Deloitte & Touche LLP as the independent auditors of the Trust. They have examined the financial statements set out on pages 16 through 26 in accordance with auditing standards generally accepted in Canada to enable them to express to the unitholders their opinion on the financial statements. Their report is set out below.

Toronto, Ontario
March 24, 2009

Rajeev Viswanathan
Chief Financial Officer of the Manager

AUDITORS' REPORT

To the Unitholders of Brascan SoundVest Rising Distribution Split Trust

We have audited the statement of investments of Brascan SoundVest Rising Distribution Split Trust (the "Trust") as at December 31, 2008, the statements of net assets as at December 31, 2008 and 2007, and the statements of operations, changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Trust as at December 31, 2008 and 2007 and the results of its operations, changes in its net assets and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

² The Trust did not participate in any securities lending activity as at December 31, 2008. The accompanying notes are integral to these financial statements

NOTES TO THE FINANCIAL STATEMENTS

December 31, 2007 and 2008

1. OPERATIONS

Brascan SoundVest Rising Distribution Split Trust (the "Trust") was established under the laws of the Province of Ontario by a declaration of trust dated March 16, 2005. The manager of the Trust is Brookfield Investment Funds Management Inc., (in such capacity, the "Manager") a subsidiary of Brookfield Asset Management Inc., and the investment advisor is Brookfield Soundvest Capital Management Ltd. (the "Investment Advisor"). Computershare Trust Company of Canada is the trustee of the Trust. The Trust is authorized to issue an unlimited number of capital units ("units") and preferred securities. The Trust is listed on the Toronto Stock Exchange and effectively commenced operations on March 16, 2005.

The Trust's investment objectives are to provide holders of preferred securities with fixed quarterly interest payments in the amount of \$0.15 per preferred security (\$0.60 per annum to yield 6% per annum on the original subscription price of \$10.00), and repayment of the original subscription price at maturity. For unitholders, the Trust's objectives are to provide holders of units with tax efficient and growing monthly cash distributions, a significant portion of which is tax deferred, and capital appreciation on the portfolio.

The Trust seeks to achieve these objectives by investing in a diversified portfolio of income trusts. The Trust may also opportunistically invest in high-yielding, equity based securities, up to a maximum of 10% of the value of the portfolio.

There can be no assurance that the Trust will be able to repay the original subscription price. Please refer to the risks discussed under the section "Risk Factors - No Assurances at Achieving Objectives" in the Trust's Annual Information Form and Prospectus.

2. ACCOUNTING POLICY CHANGES

Effective October 1, 2006, CICA Handbook Section 3855, Financial Instruments - Recognition and Measurement, requires that the fair value of financial instruments which are actively traded be measured based on the bid price for the security. Previously, fair value according to generally accepted accounting principles ("GAAP") was based on the last traded price for the day, when available. For financial reporting purposes, on January 1, 2007, the Trust adopted the amended valuation policy for actively traded securities held by the Trust on a retroactive basis (without restatement of prior periods). This change affects the reported value of the Trust's investments in its annual and interim financial statements prepared in accordance with GAAP ("Financial Statement NAV"). However, as a result of changes to National Instrument 81-106 by the Canadian Securities Authorities, the value used to determine the daily price of the Trust's securities for purchase and redemption by clients ("Published NAV") is not affected. The impact of adopting the amended valuation policy for financial reporting purposes resulted in a reduction of the Financial Statement NAV of the Trust as at December 31, 2006, by \$1,128,280 or \$0.17 per unit.

On December 1, 2006, the Canadian Institute of Chartered Accountants ("CICA") issued Section 1535, Capital Disclosures ("Section 1535") of the CICA Handbook, which establishes GAAP for financial reporting purposes. Section 1535 requires the disclosure of (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about an entity's managed capital; (iii) whether an entity has complied with capital requirements; and (iv) if an entity has not complied with such capital requirements, the consequences of such non-compliance. This section applies to fiscal years beginning on or after October 1, 2007. As a result, the Trust adopted this section prospectively, beginning January 1, 2008.

In December 2006, the CICA issued Section 3862 Financial Instruments: Disclosure ("Section 3862") and Section 3863 Financial Instruments: Presentation ("Section 3863"). These two sections replaced CICA Handbook Section 3861 Financial Instruments - Disclosure and Presentation. Section 3862 requires financial statement disclosures of the nature and extent of risks arising from financial instruments and how these risks are managed. Section 3863 establishes standards for presentation of financial instruments and non-financial derivatives. Section 3863 describes the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. These sections apply to fiscal years beginning on or after October 1, 2007. As a result, the Trust adopted these sections prospectively, beginning January 1, 2008.

In 2005, the Accounting Standards Board of Canada (AcSB) announced that accounting standards in Canada are to be replaced with International Financial Reporting Standards ("IFRS"). In May 2007, the CICA published an updated version of its implementation plan, which outlines the key decisions that the CICA will need to make as it implements the Strategic Plan for publicly accountable enterprises that will replace Canadian GAAP with IFRS by January 1, 2011. The key elements of the Strategic Plan include disclosure of the qualitative impact in the 2008 financial statements, which will be disclosed in the Trust's annual MRFP.

3 SIGNIFICANT ACCOUNT POLICIES

These audited financial statements have been prepared using the following policies determined under Canadian GAAP, and they include estimates and assumptions made by the Manager that affect the reported amounts of assets and liabilities at the date of these financial statements and the reported amounts of income and expenses during the year. Actual results could differ from these estimates.

a) Cash and Equivalents

Cash and equivalents are cash balances and short-term, highly liquid investments with original maturities of 90 days or less, and are carried at cost plus accrued interest.

b) Valuation of Investments

The Trust's investments are presented at fair value. Investments that are publicly traded are valued at their last bid price. As noted in Note 2, prior to January 1, 2007, such investments were generally valued at their last closing price. Securities that are listed on the stock exchange and that are subject to a hold period or other trading restrictions will be valued as described above, with an appropriate discount as determined by the Manager, acting reasonably. Short-term investments are valued at their fair value. Investments for which reliable quotations are not readily available, or for which there is no closing bid price, are valued at fair value as determined using the Manager's best estimates thereof pursuant to procedures established by the Manager and taking into account the last closing price, where appropriate.

The process of valuing investments for which no published market exists is based on inherent uncertainties, and the resulting values may differ from values that would have been used had a ready market existed for the investments, and may differ from the prices at which the investments may be sold. These differences could be material to the fair value of the investments as a portfolio.

c) Investment Transactions and Income Recognition

Investment transactions are recorded on the trade date and any realized gains or losses are recognized using the average cost of the investments. Interest income is recognized on an accrual basis, with dividends recorded on the ex-dividend date. Distributions from income funds, including trusts and limited partnerships, are recognized on the ex-distribution date. Net realized gains (losses) on sale of investments include net realized gains or losses from foreign currency changes.

Effective January 1, 2007, brokerage commissions incurred for portfolio transactions are included as an expense in the Statements of Operations. Brokerage commissions incurred prior to January 1, 2007 were included in the cost of investments purchased or as a reduction of the proceeds received upon the sale of investments. The Statement of Investments includes an adjustment to reduce the cost of investments for this change in accounting policy on a prospective basis.

d) Income Taxes

The Trust is taxed as a unit trust under the Income Tax Act (Canada). Provided that the Trust makes distributions in each year of its net taxable income and taxable net capital gains, the Trust will not generally be liable for income tax. It is the intention of the Trust to distribute all of its net taxable income and net realized capital gains on an annual basis. Accordingly, no income tax provision has been recorded.

e) Foreign Exchange

The fair value of investments and other assets and liabilities that are denominated in foreign currencies are translated into Canadian dollars at the closing rate of exchange on each valuation date. Purchases and sales of investments and income derived from investments are translated at the rate of exchange prevailing on the respective dates of such transactions.

f) Return of Capital

Distributions that are treated as a return of capital for income tax purposes are included in investment income and are adjusted for in the Statements of Operations. These distributions are used to reduce the average cost of the underlying investments on the Statement of Investments.

g) Other Assets and Liabilities

Distributions and interest receivable are designated as loans and receivables and are carried at amortized cost. Accounts payable and accrued liabilities, and loan payable are designated as other liabilities and are carried at amortized cost. The carrying value of the financial assets and liabilities approximates fair value.

4. NET ASSET VALUE PER UNIT

At December 31, 2008, the decline in the value of the investment portfolio exceeded the subscriptions received from the capital units which resulted in the excess being absorbed by the preferred securities. As the preferred securities are redeemable at \$10 or combined value, whichever is lower, the losses were adjusted against the preferred securities.

For financial statement reporting purposes, the fair value of the Trust's investments is measured in accordance with Section 3855 of the CICA Handbook, which for publicly listed securities is based on closing bid prices on the recognized stock exchange on which the investments are listed or principally traded. However, pursuant to an exemption provided by the Canadian securities regulatory authorities, the Trust continues to calculate the published net asset value using the last trading price.

As at December 31, 2008, the published net asset value per capital unit and the financial statement net asset value per capital unit reflected in the financial statements are both \$0.

5. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Included in accounts payable and accrued liabilities are the following:

As at December 31	2008	2007
Distributions payable to unitholders <i>(note 9)</i>	\$ —	\$ 663,153
Interest payable to security holders	308,259	284,127
Service fees payable	786	187,207
Management fees payable	45,573	90,979
Other accounts payable and accrued liabilities	108,399	39,521
	\$ 463,017	\$ 1,264,987

6. LOAN FACILITY

The Trust has a 364-day revolving term credit facility with a Canadian chartered bank up to a maximum amount of \$8,500,000, but not exceeding 7% of the value of the assets within the portfolio of the Trust, which was reduced from the lower of \$11,000,000 but not exceeding 7% of the value of the assets within the portfolio of the Trust as at December 31, 2007. Subsequent to December 31, 2008, the maximum draw under the facility was further reduced to a limit of \$5,000,000 but not exceeding 7% of the value of the assets within the portfolio of the Trust. The facility is secured by a first-ranking and exclusive charge on all of the Trust's assets. The Trust uses borrowings to purchase additional investments and for general Trust purposes. As at December 31, 2008, \$998,239 was drawn on the facility (December 31, 2007 - \$5,072,267), which represented 0% of net assets of the Trust. As the loan is payable at any time and the interest rate is variable based on the prime rate, its fair value approximates its carrying value. The minimum and maximum amounts borrowed during the year ended December 31, 2008 were \$997,640 and \$5,093,939, respectively (\$1,294,724 and \$5,891,263, respectively during 2007). A reduction in the credit facility may limit the Trust's ability to employ leverage to magnify returns. In the current environment, the Trust will seek to cautiously use leverage as deemed appropriate.

7. PREFERRED SECURITIES

On March 16, 2005, as part of the initial public offering of the Trust, 7,370,000 preferred securities were issued at a price of \$10.00 per security for cash proceeds of \$73,700,000.

Holders of the preferred securities are entitled to receive fixed quarterly interest payments of \$0.15 per preferred security, or 6% per annum, beginning on June 15, 2005, on the original subscription price of \$10.00. The interest payments are paid in arrears on June 15, September 15, December 15, and March 15 of each year. Preferred securities may be surrendered for redemption together with an equal number of units beginning in November of 2005 and annually each November thereafter. During 2006, 250,626 preferred securities were redeemed for \$2.5 million and 909,172 preferred securities were redeemed for \$9.1 million in 2007. No preferred securities were redeemed in 2008.

On October 23, 2008, the Trust announced that it was temporarily suspending the annual redemption rights that would have arisen in November 2008 for both its capital units and preferred securities. The Declaration of Trust provides for the suspension of redemptions when the 1.4 times coverage ratio cannot be maintained. The Trust is continuing to monitor its net asset value to determine if and when it will be able to resume redemptions.

A continuity of the preferred securities of the Trust is as follows:

Issued	Number of Units	Amount
Preferred securities - December 31, 2006	6,591,715	\$ 65,917,150
Redeemed for cash		
Cancelled after redemption for cash	(909,172)	(9,091,720)
Preferred securities - December 31, 2007	5,682,543	56,825,430
Redeemed for cash		
Cancelled after redemption for cash	—	—
Decrease in value of preferred securities (<i>note 4</i>)	—	(8,921,502)
Preferred securities - December 31, 2008	5,682,543	\$ 47,903,928

The preferred securities will mature on March 31, 2015. Upon maturity, the preferred securities will receive the lesser of the original subscription price \$10.00 or combined value. At December 31, 2008, the decline in the value of the investment portfolio exceeded the subscriptions received from the capital units, which resulted in the excess being absorbed by the preferred securities. As the preferred securities are redeemable at \$10.00 or combined value, whichever is lower, the losses were adjusted against the preferred securities. The securities may be called and purchased prior to the maturity date if the aggregate amount of preferred securities outstanding would exceed the aggregate number of units outstanding. In such case, preferred securities will be redeemed at a price per security, which until March 31, 2006 was equal to \$11.00 and declining by \$0.10 each year thereafter to \$10.10 after March 31, 2014 to March 30, 2015, plus any accrued and unpaid interest.

8. UNITS OF THE TRUST

On March 16, 2005, the Trust completed its initial public offering of 7,370,000 units at a price of \$15.00 per unit. Proceeds raised, net of agents' fees and issuance costs of \$8,899,125 totalled \$101,650,875. As at December 31, 2008, the Trust had \$2,150,622 (2007 - \$3,930,447) of issuance costs available, which will be deducted for tax purposes over the next two years.

The Trust is authorized to issue an unlimited number of transferable, redeemable units of beneficial interest, each of which represents an equal, undivided interest in the net assets of the Trust. Each unit entitles the holder to one vote and to participate equally with respect to any and all distributions made by the Trust. Units may be surrendered for redemption at any time during November of any year, but at least 15 business days prior to the last business day in November (the "Redemption Date"). Redemption of surrendered units will be effected at the net asset value on the Redemption Date each year and will be settled on or before the 15th business day following such effective date.

On October 23, 2008, the Trust announced that it was temporarily suspending the annual redemption rights that would have arisen in November 2008 for both its capital units and preferred securities. The Declaration of Trust provides for the suspension of redemptions when the 1.4 times coverage ratio cannot be maintained. The Trust is continuing to monitor its net asset value to determine if and when it will be able to resume redemptions.

To enhance liquidity and provide market support for the units, the Trust has a market repurchase program under which the Trust purchases units for cancellation. Purchases may be made at any time the price at which units are offered in the market is less than 95% of the latest determined net asset value per unit, up to a maximum in any calendar quarter of 1.25% of the outstanding units at the beginning of such calendar quarter. During 2008, the Trust did not purchase any units for cancellation under the market repurchase program (2007 - nil units).

During 2008, the Trust received 0 units (2007 - 909,172 units) for redemption (see note 7), which were cancelled at an average price of \$0 per unit (2007 - \$6.46 per unit). The Trust may use commercially reasonable efforts to find purchasers for any units properly surrendered for redemption, in accordance with the Recirculation Agreement.

A continuity of the units of the Trust is as follows:

Issued	Number of Units		Amount
Units - December 31, 2006	6,591,715	\$	92,824,998
Redeemed for cash			
Cancelled after redemption for cash	(909,172)		(5,870,225)
Units - December 31, 2007	5,682,543		86,954,773
Redeemed for cash			
Cancelled after redemption for cash	-		-
Units - December 31, 2008	5,682,543	\$	86,954,773

The weighted average number of units outstanding for the year ended December 31, 2008 was 5,682,543 (2007 - 6,571,788).

9. DISTRIBUTIONS PAYABLE TO UNITHOLDERS

Distributions on units, as declared by the Manager, are made on a monthly basis to unitholders of record on the last business day of each month. The distributions are payable no later than the 15th day or the first business day after the 15th day of the month following the record date. Distributions on preferred securities, as declared by the Manager, are made on a quarterly basis to security holders of record on the last business day of February, May, August and November and payable on the 15th day of the subsequent month. Distributions payable as at December 31, 2008 totalled \$0 (2007 - \$663,153). On December 18, 2007, the Trust announced that it was decreasing its monthly distribution to \$0.084 per unit or \$1.008 on an annual basis effective with the January 2008 distribution, payable in February 2008. On October 23, 2008, the Trust announced that it was suspending its distribution on its capital units, in accordance with its Declaration of Trust, as the Trust's net asset value was below the required 1.4 times coverage ratio. The distribution was suspended for the remainder of 2008 and the Trust will continue to monitor its net asset value per capital unit to determine if it will be able to make monthly distributions in the future.

10. MANAGEMENT AND SERVICE FEES

Pursuant to a management agreement, the Manager provides management and administrative services to the Trust, for which it is paid a management fee equal to 1.10% per annum of the net asset value of the Trust, calculated and paid monthly, plus applicable taxes. The Trust also pays to the Manager a service fee equal to 0.40% per annum of the net asset value of the Trust, calculated and paid quarterly. The service fee is in turn paid by the Manager to investment dealers based on the proportionate number of units held by clients of such dealers at the end of each calendar quarter.

11. INVESTMENT TRANSACTIONS

Investment transactions¹ for the year ended December 31 were as follows:

	2008	2007
Proceeds from sale of investments	\$ 16,750,111	\$ 42,305,618
Less cost of investments sold		
Investments at cost - beginning of year	103,960,539	129,865,674
Investments purchased during the year	10,953,297	21,559,856
Investments at cost - end of year	85,174,096	103,960,539
Cost of investments sold during the year	29,739,740	47,464,991
Net realized losses on sale of investments	\$ (12,989,629)	\$ (5,159,373)

¹ All balances have been adjusted for Return of Capital amounts

Brokerage commissions on securities purchased and sold during the year ended December 31, 2008 totalled \$51,783 and are included as an expense in the Statements of Operations. Brokerage commissions on securities purchased and sold during the year ended December 31, 2007 totalled \$119,925 and are included in the cost of securities purchased or netted against proceeds received from securities sold.

12. CAPITAL DISCLOSURES

The Trust's capital structure is comprised of unitholders' equity and the loan payable. The Trust's objective is to utilize prudent levels of leverage to lower the Trust's cost of capital to increase the total return to unitholders. In managing its capital structure, the Manager may adjust the amount of distributions paid to unitholders or re-evaluate the Trust's leverage ratios. The Manager also manages the composition of its investment portfolio to ensure that the Trust is within its investment objectives, and thus in compliance with the requirements of the loan facility.

13. RISK MANAGEMENT

The Trust aims to maximize monthly distributions primarily through investments in business trusts, power generation and pipeline trusts, royalty trusts and real estate investment trusts. The Manager uses a disciplined, fundamental approach in its investment selection and management approach, which consists of an intensive and ongoing research process of investment opportunities across a broad range of investment vehicles in various industries and geographic regions. The Manager purchases and holds securities for the Trust for the medium to long term. The Manager also determines the timing to rotate the Trust's portfolio into other sectors and investment vehicles to enhance the Trust's portfolio performance and/or limit risk.

Market Risk

Market risk represents the potential loss that can be caused by a change in the fair value of the financial instrument. The investments of the Trust are subject to normal market fluctuations and the risks inherent in investment in the trust market. The Trust intends to continue to invest taking a long-term perspective while focusing on quality businesses that consistently deliver strong returns for unitholders.

The Trust's preferred securities and the use of the loan facility expose unitholders to leverage such that any increase or decrease in the published net asset value of the investment portfolio will result in a greater proportionate increase or decrease in the net asset value per unit of the Trust.

The Trust's investment portfolio and leverage are monitored on a daily basis by the Manager.

The Manager's best estimate of the effect on net assets due to a reasonably possible change in the S&P/TSX Capped Income Trust Total Return Index, with other variables held constant, is as follows. If income trust prices on the S&P/TSX Capped Income Trust Total Return Index increased or decreased by 10.00%, and all other variables held constant, the net assets of the Trust would increase or decrease by 14.11%, respectively. In practice, the actual results may differ from the above sensitivity analysis and the difference could be material.

Interest Rate Risk

The majority of the Trust's assets are non-interest bearing; however, the bank loan facility bears interest at the prime rate. The Trust is also exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its investments.

Credit Risk

Credit risk represents the potential loss that the Trust would incur if the counterparties failed to perform in accordance with the terms of their obligations to the Trust. The Trust maintains all of its cash and equivalents at its custodian or with a Canadian chartered bank. All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The Trust is also subject to credit risk as the counterparty in securities lending activities may default under the terms of the agreement, which would require the Trust to make a claim to recover its investment. When recovering its investment on a default, the Trust may incur a loss if the value of the portfolio securities loaned may have increased in value relative to the value of the collateral held by the Trust.

Currency Risk

The assets and liabilities of the Trust are predominantly held in the functional currency of the Trust, which is the Canadian dollar. The Trust is not exposed to significant foreign-currency risks.

Liquidity Risk

The Trust invests the majority of its assets in investments that are traded in an active market and can be readily disposed of since it invests only a limited proportion of its assets in investments not actively traded on a stock exchange. There can be no assurance that an active trading market for the investments will exist at all times, or that the prices at which the securities trade accurately reflect their values. Thin trading in a security could make it difficult to liquidate holdings quickly.

The Trust is also exposed to annual cash redemptions of Trust units, however, the Trust has up to approximately 30 days to raise the necessary cash to fund the required redemption payment amount. The Trust maintains liquid investments that are traded in an active market and can be readily disposed of, subject to the limitations noted above, to maintain adequate liquidity.

14. SUBSEQUENT EVENT

On February 9, 2009, Brookfield Investment Funds Management Inc., as manager of the Trust, announced that the Toronto Stock Exchange had accepted its Notice of Intention to make a normal course issuer bid. The Trust will have the right under the bid to purchase for cancellation up to 284,127 of its capital units and 284,127 of its preferred securities, representing 5% of the 5,682,543 capital units and 5,682,543 preferred securities issued and outstanding as at January 29, 2009.

In accordance with the Trust's declaration of trust and trust indenture, any capital units purchased for cancellation will be accompanied by the Trust repurchasing an equal number of preferred securities, and vice versa. Purchases may commence on February 11, 2009, and will terminate on February 10, 2010. The Trust will not purchase in any given 30-day period, in the aggregate, more than 113,651 capital units and 113,651 preferred securities, being 2% of the issued and outstanding preferred securities and capital units as of the date hereof. Purchases made pursuant to the normal course issuer bid will be made in the open market through the facilities of the Toronto Stock Exchange. The price that the Trust will pay for any such shares will be the market price of such shares at the time of acquisition.

The Manager is of the opinion that Capital Units and Preferred Securities of the Trust may become available during the proposed purchase period at prices that would make such purchases in the best interests of the Trust and its securityholders. The Trust has not previously purchased its Capital Units or Preferred Securities under a normal course issuer bid.

As at March 24, 2009, the Trust has repurchased 8,400 capital units and 8,400 preferred securities under the normal course issuer bid.
